**Athens: 09/10/2025****Cert. Num: C2526-00066****CERTIFICATE OF ANALYSIS****Brand Name:** Δ1 - LIANOLIA ORGANIC GREEN OLIVE OIL**Analysis Date:** 01/10/2025**Owner:** PAPANIKOS PANAGIOTIS EVANGELOS**Variety:****Origin:****Harvesting Period:** SEPTEMBER 2025**Production Date:****Oil Mill:****Chemical Analysis**

Oleocanthal	491	mg/Kg
Oleacein	254	mg/Kg
Oleocanthal+Oleacein (index D1)	745	mg/Kg
Ligstroside aglycon (monoaldehyde form)	51	mg/Kg
Oleuropein aglycon (monoaldehyde form)	53	mg/Kg
Ligstroside aglycon (dialdehyde form)*	102	mg/Kg
Oleuropein aglycon (dialdehyde form)**	44	mg/Kg
Free Tyrosol	<5	mg/Kg
Total tyrosol derivatives	644	mg/Kg
Total hydroxytyrosol derivatives	350	mg/Kg
Total polyphenols analyzed	994	mg/Kg

**Comments:**

The levels of oleocanthal and oleacein are higher than the average values (135 and 105 mg/Kg respectively) of the samples included in the international study performed at the University of California, Davis.

The daily consumption of 20 g of the analyzed olive oil provides 19,88mg of hydroxytyrosol, tyrosol or their derivatives.

Olive oils that contain >5 mg per 20 gr belong to the category of oils that protect the blood lipids from oxidative stress according to the Regulation 432/2012 of the European Union.

It should be noted that oleocanthal and oleacein present important biological activity and they have been related with anti-inflammatory, antioxidant, cardioprotective and neuroprotective activity.

The chemical analysis was performed at the National and Kapodistrian University of Athens according to the method that has been submitted to EFET and published in J. Agric. Food Chem. 2012, 60, 11696, J. Agric. Food Chem. 2014, 62, 600 & Molecules 2020, 25, 2449.

The results relate to the analyzed sample.
